The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Kondo et al (5,304,389).

Kondo discloses non-hygroscopic icing compositions that contain sugar and fat and water in the amounts set forth in the claims 3, 6 and 7 (example 3 and table 3). The particle size of the sugars, claimed in claims 1-3, is disclosed in the abstract. The melting properties of the fat used in the product that is claimed in claim 4 is shown in example 4. The concept of heating the mixture to melt it and then cooling it, as set forth in claims 8-10, is shown in example 5. The use of fats with lauric acid in them is shown at column 3, line 7. Thus although the disclosure of fats with SU2 and U3 content of less than 20% is not specifically described in the reference, their amounts would have been included in the composition of the claims.

Claims 1-3, 6 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Beeson (6,287,636) and see examples 2 and 3. Beeson is directed to a cold water soluble creamer but the intended use of the product does not alone provide patentable weight to the the product.
